

## WIRELESS COMMUNICATION APPARATUS

### Abstract of Disclosure

5 A communication apparatus including a wireless communication device, a  
network interface device and a receptacle assembly body. A data transfer portion is  
attached to the receptacle assembly body. The data transfer portion is electrically  
connected to the network interface device. A wireless communication portion is  
attached to receptacle assembly body. The wireless communication portion is  
electrically connected to the wireless communication device. A single receptacle  
10 assembly can be used to separately interconnect a plurality of types of communication  
devices to an electronic device in a space efficient and cost effective manner.
